

In **MATHS**, we will be improving our multiplication skills, tackling fractions in detail, and angling ourselves towards geometry!

## IT'S A SHOCKING TOPIC!

How about a trip to the Science Museum?

In **HISTORY** we will continue to research technological breakthroughs and the impact they've had on Britain and the world at large, while our **GEOGRAPHY** lessons will see us investigating Europe – the birthplace of many great inventors.

In **ENGLISH** we will be making connections with **SCIENCE**, studying biographies of great inventors linked to electricity and other related types of energies and technology. We'll get to know Tesla, Edison, Volta, Faraday, etc. Sci-fi will also rear its formidable, allegorical head!

In **DT**, and borrowing heavily from our lessons in **SCIENCE** once again, we'll be designing, planning, and constructing our own Quiz Show system. (Yes, there'll be a Quiz at the end of term!)
