

In **ENGLISH**, we will use vocabulary to unlock all the doors that make poetry fun, challenging, rebellious, and immortal! We will be reading, analysing, reciting, and writing poems with a particular emphasis on the senses, and in particular, taste. We hope to invite the whole school to take part in a Poetry Slam nearer the end of the half-term to share all the wondrous rhythms and word-spells pulsing through school.

In **SCIENCE** we will find out what makes us tick. Starting with an investigation into the circulatory system, we will learn what it means to be healthy from the inside out.

In **MATHS** we will be looking at co-ordinate grids and learning how to translate and reflect 2D shapes over multiple quadrants! Oh, and tonnes of revision!

**You Are
What
You Eat**

Years 5 & 6

In **ART**, we will be examining, appreciating, and attempting to mimic the surreal work of Italian painter, Giuseppe Arcimboldo. We've done a good deal of sketching and design with various materials this year. Is the class ready to try their hand at such extreme and bizarre painting?!

(Did someone say, "farm"?)

In mid-May it's SATs time and the Year 6s are going to do brilliantly! You can help them with expressions of praise and encouragement and gratitude for being the coolest, most determined Year 6s yet!

In **GEOGRAPHY**, we will consider the physical geography of the UK and how it is used to support agriculture. While in **HISTORY**, we will consider where and how agriculture began, what it means to us today, and how technology provides ongoing support to how food is produced.
