

## Our topic for Summer is: Times through Terling

### English

In English, we will be learning about a variety of text types including fear stories, leaflets, fact files and fairy tales. We will also be writing nonsense poems.

### Maths

In Year 1 and 2 we will be beginning a new topic of fractions, as well as continuing to consolidate place value, addition, subtraction, multiplication and division.

### Topic

In our topic, we will be learning about the 'Times Through Terling'. We will be learning about the geography of Terling. We will be learning geographical vocabulary and learning to use fieldwork and observational skills, both within the school grounds and village. From this, we will create our own maps of the village. We will also be exploring the history of the school by interviewing local residents and comparing the school then to now, building on our ability to observe changes that occurred in our own lifetimes.

### PSHE

We will be learning about health and well-being including thinking about what it means to be healthy, basic hygiene routines and different types of play (indoor, outdoor, screen).

### Science

Our science focus will be plants. We will be observing and describing how seeds and bulbs grow into mature plants, exploring the ways in which plants successfully grow and describe the structure of a plant. As well as, continuing to observe seasonal changes.
